

# EYE DIFF *Plus*

Presbyopic Foldable IOL

EYE DIFF *Plus* - R

Innovative Refractive-Diffractive Intraocular Lens

Refractive-Diffractive Optic | Slanted Transition Zones | 360° Square Edge | Aberration Neutral

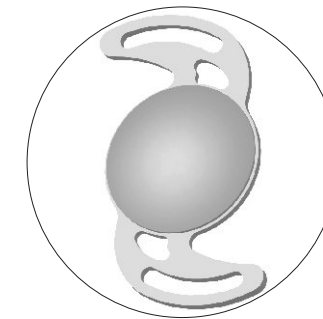

EYEOL U.K. LIMITED

## Presbyopic Foldable IOL

### EYE DIFF *Plus*

Refractive-Diffractive Optic | Slanted Transition Zones | 360° Square Edge | Aberration Neutral

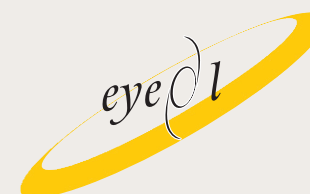

EYE DIFF *Plus* - R

Optic Size : 6.00 mm  
Overall Length : 12.50 mm

Optic Design	Modified refractive-diffractive & aspheric surface
Optic & Haptic Material	Hydrophilic Acrylic
Haptic Angulation	0°
Power	Available from 0 D to +30.0 D
Sterilization	Steam
Refractive Index	1.467
A-Constant	118.0 (theoretical)
Delivery System	Disposable
Addition for Near Vision : +3.0 D / +3.5 D / +4.0 D	

#### Features:-

- ⊙ New generation Refractive - Diffractive Presbyopic IOL.
- ⊙ Provides Better Visual outcomes by reducing reflected glare.
- ⊙ Provides Full Range of Vision.
- ⊙ Reduces pupil dependency.
- ⊙ Balanced distribution of light energy for all pupils.
- ⊙ Reduces scattering of light & halos through slanted transition zones.
- ⊙ Less sensitive to decentration.
